IQS Release History

IQSweb V2 and Higher Release History

Release Dates/Description	Database Version	Program Version
9/30/2010	V2.0.1	V2.0.1
V2 Major Release		
11/24/2010	V2.0.2	V2.0.2
Performance Issue for Large		
Databases Patch		
5/6/2011	V2.0.2	V2.0.3
Comment Data Overwrite		
Patch for V2.0.2 users.		
3/20/2012	V3.0.0	V3.0.0
V3 Major Release		
7/3/2012	V3.0.1	V3.0.1
Security Issue Patch		
3/5/2014	V3.1.1	V3.1.1
Enhancements and bug fixes		
including 310-1 update.		
7/1/2014	V3.1.2	V3.1.2
Minor bug fixes found in		
V3.1.1		
12/22/2015	V4.0.0	V4.0.0
V4 Major Release		
2/27/2017	V4.0.2	4.0.2
V4 Patch addressed Transfer		
Out issue.		
2/13/2018	V5.0.0	V5.0.0
V5 Major Release		
2/27/2020	V6.0.0	V6.0.0
V6 Major Release – IRWIN		
Integration		

IQS V6 Integration Features

The Resource Ordering and Statusing System (ROSS) is being decommissioned on March 5th and replaced by a new system called IROC. For IQS systems that currently connect to ROSS, IQS v6 has been modified to use the IRWIN integration service to pass resource, qualification and experience data between IROC and IQS.

The list below represents a summary of features new in IQSv6 for connecting to the IRWIN integration service.

- 1. The direct connection to ROSS will be replaced by a real-time connection to IRWIN.
- 2. IROC and some CAD's (Computer Aided Dispatch programs such as Texas FS Wires) will read overhead resource information from IRWIN.
- 3. The connection to ROSS will remain functional until ROSS is decommissioned at 2400 EST on March 5th, 2020.
- 4. An IRWIN username and password will be required for each installation of IQS. Steps for applying for IRWIN credentials have been sent to you via your geographic IQS representative.
- 5. The "ROSS" checkbox on Person/Org and Qualifications is now labeled "Integration".
- 6. Person/qualification updates will be sent to IRWIN by background processes rather than manually sending the updates. Unsuccessful updates can be reviewed, reconciled and resent.
- 7. All resources shared through IRWIN will be assigned a unique IRWIN resource ID. The Resource Clearinghouse ID will no longer be generated or used. However, the RCID will still be visible on those records that have one for purposes of resolving possible duplicate resources.
- 8. Reconciling potential duplicates will be handled by the IQS Manager as there will no longer be a "Resource Clearinghouse".
- 9. IQS will share the "Dispatch Level" on National, Compact, and State qualifications allowing IROC users to fill compact orders.
- 10. Experience will be available for all incidents including initial attack when tracked by IRWIN-integrated systems. Experience will be updated nightly. The current functionality in IQS for entering an incident and experience directly will not change.

Bug Fixes and Enhancements
