| 3/3/2025 V7.1.3 Minor Release - IRWIN V9 Integration update and other high priority fixes. | v7.1.3 | V7.1.3 |

Bug Fixes and Enhancements

The list below represents a summary of items addressed in IQS V7.1.3

| Ticket ID Bug Fix/Enhancement Description IQS Module | | |
|--|---|-----------|
| 10374 | Fixed issue caused by the IRWIN V9 column name change in their CapabilityType table. The column PositionCode changed to ItemCode. The hangfire job HF Jobs.ImportQualJobs was updated to include this column change. This fixes errors received when running the job and also the inability to integrate resources with missing positions. | IRWIN |
| 10380 | Remove Preprod check for initial deployment of IRWIN | Installer |
| 10379 | TBD: When an IQS system (v7.1.2) is sending updates to IRWIN, in some cases a General Status of Available or Unavailable are being sent to IRWIN which updates the resource's availability in IROC. In most cases this is an un-intended status change and Dispatchers must manually change the resource's status in IROC to the desired status. | IRWIN |
| 10381 | Added Missing/Incorrect files in 7.1.3 Installer | Installer |
| 10382 | Hangfire Job Failures. Fixed by updating the scripts in how the date conversion handled larger integers. The new function requires SQL Server 2016 or higher. | IRWIN |

| | | |
|-------|---|--------|
| 10383 | Fixed unnecessary calls made to IRWIN from PersonOrg page; grid disabled when IRWIN is down or unreachable. | V7.1.3 |
| 10386 | Employment Status selection box does not work and always returns nothing since EmploymentStatusID is missing from one of the selects. This required a database update | V7.1.3 |
| 10387 | Number of imported IRWIN Jobs limited to only Overhead Capabilities. | V7.1.3 |
